The premise and implementation of the audit

The work of the Finnish Education Evaluation Centre (FINEEC) is based on the principle of enhancement-led evaluation and producing impactful information which contributes to the enhancement of education.

The purpose of the audit model is

- to evaluate whether the quality work in the HEI meets the European quality assurance standards,
- to assess whether the quality system produces relevant information for the implementation of the strategy and the continuous development of the HEI's activities, and whether it results in effective enhancement activities,
- to encourage internationalisation, experimenting and a creative atmosphere at HEIs, and
- to accumulate open and transparent information on quality work at Finnish HEIs.

The principles of the audit model are described in [the audit manual](#).

The implementation of the audit

The four-member audit team carried out the audit. The members of the audit team were:

- XX
- XX
- XX
- XX

XX and YY from the Finnish Education Evaluation Centre acted as project managers of the audit. The audit is based on the material submitted by the higher education institution, self-assessment report, additional material requested by the audit team and the audit team's visit to the institution xx-xx-month year. The audit team had also access to essential electronic materials and systems. The main stages and timetable of the audit were:

Agreement negotiation	xx.yy.20xx
Appointment of the audit team	
Submission of the audit material and self-assessment report	
Information and discussion event at the HEI	
Audit visit	
Higher Education Evaluation Committee's decision on the result	
Publication of the report	
Concluding seminar	
Follow-up on the enhancement work	

Evaluation criteria

The evaluation areas I-III are each assessed as one entity using the scale *excellent*, *good*, *insufficient*.

The level *excellent* means that the HEI shows evidence of long-term and effective enhancement work. The HEI's enhancement activities also create substantial added value for the HEI, stakeholders, or both. The HEI presents compelling examples of successful enhancement activities.

The level *good* for the evaluation areas I-III is described in appendix 1.

The level *insufficient* means that the HEI shows an absence of or major shortcomings in systematic, functioning, and participatory procedures in the evaluation area (I-III). There is no clear evidence of the impact of quality management in the enhancement of activities.

In order for the HEI to pass the audit, the evaluation areas I-III should reach at least the level *good*.

The organisation and strategy of the HEI

Describe briefly your HEI and its organisation. Please attach a chart of the organisation.

Describe the most important strategic objectives of the HEI. Please attach the strategy.

1 HEI creates competence

- Assessment of the audit team

The evaluation area I assesses the procedures which support student-centred, working-life oriented planning, implementation and enhancement of education, which is based on research or artistic activities.

The evaluation area I as a whole is at the level XX.

The audit team identified the following as the main strengths and enhancement areas:

1.1 The planning of education

- HEI's self-assessment

[karvi](#)

Please briefly **describe** the procedures used by your HEI to plan education. **Assess** the functioning of these procedures.

[auditointikäsikirja](#)

Use the following sub-questions in the self-assessment, as applicable:

- How does the HEI ensure that the educational provision is linked to the strategy?
- How has the HEI ensured that the degree programmes correspond with the appropriate level in the National Framework for Qualifications and Other Competence Modules?
- How is the relevance to working life taken into account in the planning of education?
- How is internationalisation taken into account in the planning of education?
- How are the continuous learning needs taken into account in the planning of education?
- How is it ensured in the planning of education that the teaching methods, assessment methods and learning environments support the achievement of learning outcomes?
- How are research, development and innovation activities and/or artistic activities integrated in the teaching? How does the HEI ensure that the research knowledge is linked to education? How are staff members encouraged to strengthen the connection between education and research, development and innovation activities and/or artistic activities?
- How is the workload of students measured and monitored?
- How can students and external stakeholders participate in the planning of education?
- How are the plans of degree programmes and other study entities approved?

1.2 The implementation of education

- HEI's self-assessment

Please briefly **describe** the procedures used by your HEI to ensure the quality of education. **Assess** the functioning of these procedures.

Use the following sub-questions in the self-assessment, as applicable:

- What procedures does the HEI use to ensure transparency in student selection?
- How is the prior learning assessed and recognised (RPL)?
- How do the selected teaching methods support target-oriented learning?
- What concrete examples does the HEI have of encouraging students to take an active role in the learning processes? How do the students receive feedback on their learning?
- How is the connection to working life taken into account in the implementation of education?
- How are flexible study paths and mobility within/between HEIs enabled?
- How are students supported at different stages of their studies? What procedures are used to intervene in the termination of studies? How does the HEI promote the well-being of students? How is the equal treatment of students guaranteed?

Please name the evaluation area in which benchlearning is applied. Briefly describe the planning and implementation of the benchlearning process and assess the success of the process.

Use the following sub-questions in the description:

Describe the planning and implementation of the benchlearning process.

- Briefly describe the benchlearning target and partner organisation. How were the target and partner selected? Describe the reasons for selecting this target and partner.
- What objectives were set for the benchlearning?
- Describe how you proceeded with the process. What was the timeline of the process and who participated in it? What tools/methods were used in the process? How was the visit organised?

Assess the implementation of the process.

- How successful was the process? Were the objectives that were set achieved?
- What kind of observations were made? Compare good practices at your own HEI with good practices of the partner organisation. What similarities and differences did you find? Please summarise your findings in the table below.
- How are you planning to apply new ideas in your HEI? Please give concrete examples and summarise your findings in the table below.

Please give a concrete example/examples of how you plan to apply or have already applied good practices of your benchlearning partner.

Appendix 1. Evaluation criteria for the level good

1 Evaluation area I: HEI creates competence

1.1 The planning of education

The degree programmes and other provision are planned with clearly defined learning outcomes. The planning process ensures that the educational provision is in line with the HEI's strategy and relevant for working life. Aspects concerning internationalisation and continuous learning needs are ensured in the planning process. In terms of degrees, it is ensured that they correspond with the National Framework for Qualifications and Other Competence Modules. The education is planned so that the teaching methods, assessment of learning, and learning environments support the achievement of the learning outcomes. Students and external stakeholders participate in the planning of education in a purposeful manner. Research, development, innovation and artistic activities are integrated in the education in a way that links research-based information to the education in a relevant way. The students' workload is defined according to the principles of the ECTS (European Credit Transfer and Accumulation System). The HEI has systematic procedures for approving the plans for degree programmes or other study entities.

1.2 The implementation of education

The HEI applies the provisions and regulations concerning student admission, the recognition of prior learning, progress of studies and completion of degrees consistently and transparently. The education is implemented in a manner that supports target-oriented learning and the active role of students in their own learning process. Students receive feedback on their learning which helps them achieve the learning outcomes. The procedures connected with the implementation of education support the efficient progress and completion of studies as well as the integration of students with professional life. The well-being and equality of students are promoted throughout the student's study path. The HEI provides adequate resources, counselling and other services to support the progress of studies and learning.

1.3 The evaluation and enhancement of education

The HEI systematically collects and uses feedback data on the needs of students, the implementation of the education and the progress of studies in order to enhance the education. Feedback-on-feedback, i.e., information on changes introduced based on student feedback is provided to students in an appropriate manner. The HEI monitors and evaluates the degree programmes and other provision to ensure that they are up to date with regard to the latest research findings as well as the changing needs of the society and working life. Opportunities for continuous learning are ensured in the educational provision. In the degree programmes and other provision, how well the intended learning outcomes are achieved is analysed. Feedback and evaluation data is used systematically in the enhancement of education. The needs of staff and

students are considered in the development of support services.

1.4 The HEI's examples of successful enhancement activities

The HEI is able to present examples of successful enhancement activities.

2 Evaluation area II: HEI promotes impact and renewal

2.1 Managing societal engagement and impact

The HEI enhances its societal engagement and impact, and this is also supported by its management system. The HEI has defined goals for its societal engagement and ways in which it attempts to reach those goals. Information produced by the HEI's analysis of its operational environment is used to set the direction for its activities. Appropriate procedures help to ensure that societal engagement supports the implementation of the HEI's overall strategy.

2.2 Research, development and innovation activities as well as artistic activities with impact

The HEI's research, development and innovation activities as well as artistic activities contribute to reforming society. Targets have been set for the impact of the HEI's research, development, innovation and artistic activities. The HEI collects relevant information regarding the societal impact of research, development, innovation and artistic activities, and the information is used in the enhancement of these activities. The HEI has systematic procedures for ensuring the responsible conduct of research. The HEI enhances open science.

2.3 Promoting renewal through the organisational culture

The organisational culture of the HEI encourages experimental activities with partners and strengthens the conditions for a creative atmosphere. The HEI seeks opportunities to engage with stakeholders in activities which enable renewal and enhancement. The HEI has functioning procedures that support the use of the competences possessed by its staff and students. The HEI has target-oriented cooperation with its alumni and it utilises the alumni in enhancement activities. Collaboration with both national and international networks supports the enhancement of the HEI's activities. The HEI has well-functioning procedures for managing and updating its stakeholder relations and collaboration networks.

2.4 The HEI's examples of successful enhancement activities

The HEI is able to present examples of successful enhancement activities.

3 Evaluation area III: HEI enhances quality and well-being

3.1 Using the quality system in strategic management

The principles, objectives and responsibilities of the quality system constitute the HEI's quality policy, which is public. The quality policy forms a common basis for the quality work. The information generated by the quality system is used in the management of the HEI. The system supports the profile of the HEI, the achievement of its objectives related to the core duties and the implementation of its strategy. The HEI ensures that the staff recognise the connection between their own work and the goals of the HEI.

3.2 Supporting the competence development and well-being of the staff

The HEI has functioning procedures to identify development needs concerning staff competence and to support the development of staff competence. The HEI has transparent procedures for staff recruitment. The HEI has systematic procedures to support the well-being, equality and non-discrimination of staff.

3.3 Functionality and development of the quality system

The HEI has a functioning quality system which covers its core duties. The quality system helps the HEI to recognise development needs and to enhance its activities in a goal-oriented manner. There is evidence of the functionality and impact of the quality system on the enhancement of the core duties. The system is developed in a systematic manner.

The quality culture of the HEI is participatory and open. Staff, students and external stakeholders participate in the enhancement of the HEI's activities in a purposeful manner.

3.4 The HEI's examples of successful enhancement activities

The HEI is able to present examples of successful enhancement activities.
