## 4 HEI as a learning organisation

### - Assessment of the audit team

*Evaluation area IV assesses an area selected by the HEI where it wishes to receive feedback for the enhancement of its activities.*

The University of Ljubljana selected the Quality assurance of joint educational offerings as evaluation area IV.

### **The audit team identified the following strengths and recommendations:**

#### **Strengths**

- The university has a clear strategic goal to increase internationalisation in educational provision, which is a prerequisite for developing joint educational offerings.
- There is strong individual commitment from the staff engaged in joint educational offers.
- Graduation rates and study duration are at a good level in the university's joint study programmes.

#### **Recommendations**

- The university should move from an individual approach to an institutionalised approach in joint study programmes. This would guarantee a solid common knowledge base, a platform for sharing experiences and good practices as well as common guidelines.
- Variation in student experiences, e.g., recognition, student selection, course offer, study plan, demands more proactive approaches at the university in planning and implementation of the joint educational offer.

- Senate should acknowledge and pay more attention to facilitating and developing joint education offers in the future, including financial sustainability.
