I: HEI creates competence: good level
II: HEI promotes impact and renewal: good level
III: HEI enhances quality and well-being: good level
HEI as a learning organisation – evaluation area chosen by University of Jyväskylä

Multidisciplinary education across unit boundaries

Theme and partner for benchlearning

Continuous improvement of teachers’ pedagogical competence

Partner: Vrije Universiteit Amsterdam (VU)

Key strengths and recommendations

Strengths

- At the University of Jyväskylä, education activities are managed systemically and in cooperation with the vice rector, the vice deans, directors of independent institutes, and the vice directors responsible for education.
- The University has a strong role as a regional developer and guardian of regional interests. This role is also recognised by its stakeholders.
- The University supports and promotes the well-being, equality and non-discrimination of its staff in various ways.
- A multidisciplinary approach is valued at the University of Jyväskylä, which is concretely manifested in its multidisciplinary degree programmes. The multidisciplinary degree programmes are bold initiatives and broad cooperation is carried out within the University to implement them.

Recommendations

- The functioning and transparency of collecting and analysing feedback and developing teaching and learning based on it should be improved in the University as a whole.
- Objectives and indicators that enable monitoring should be set for the University’s cooperation with the society and stakeholders.
- The University’s quality system should be complemented for the parts that relate to societal engagement and impact.
- For the University to be able to enhance the planning, implementation and effectiveness of the multidisciplinary degree programmes, operational planning and incentive systems must better support cooperation between faculties.
